By combining German engineering with more-affordable Asian glass, this new company is earning a reputation for producing premium optics at midrange prices. I love an 8X compact for turkey hunting, and this one is comfortable in hand, has impressive resolution and low-light performance, and offers some nice pluses you don't always see in this price range, including a durable magnesium body, locking aluminum eyecups, and a lifetime warranty. Also available in 10x32, 8x42, and 10x42. —D.H.
