**GPO USA PASSION™ 8x42 ED Binocular Wins
Best Birding Binocular Award**

RICHMOND, Va. (Feb. 12, 2020) — Best Binoculars Reviews (BBR) has awarded the GPO PASSION 8x42 ED binocular with its 2020 Best Birding Binocular. Now in its tenth year, BBR awards the very best binoculars they have fully tested and reviewed in the past 12 months in a range of categories.

BBR website publisher commented about the quality of the GPO 8x42 binocular: “For just about all uses, but especially important for birding, an image that is of excellent quality and true to life is a critical feature. This is because it not only ensures you can fully appreciate the beauty of the birds in all their glory but sometimes, tiny differences in plumage colorations can make the difference when trying to positively identify one sub-species from another.

“As most birders will know, having a wide field of view is another extremely important feature as it enables you to more easily find and then follow your subjects, this is especially true of the small faster-moving ones at closer ranges! At 426ft wide at 1,000 yards, these GPO binoculars have an extremely wide view that ranks up there with the very widest 8x42 binoculars currently on the market and which is why I would certainly describe them as being a wide angle binocular.

“As with the predecessor, another reason I chose these over the other contenders is down to them having an excellent build quality level and with it a performance that was well above what I would expect to find in just about every area.

“Indeed I would go as far as to say that these GPO binoculars have no major weaknesses, which makes them a very versatile instrument that will not only stand out in most types of birding but also many other areas and thus I feel they rank up there with the best binoculars for 2020 overall.”

To be eligible for a BBR Award and be considered one of the best binoculars for 2020, it has to have been fully reviewed and tested by BBR. According to the website, BBR reviews are written after thoroughly researched, used and then tested and compared to other binoculars in its class.
