

Speed Beez Revolver Loading System

Consisting of a speedloader, loading block and carry case, the Speed Beez Bundle set for revolvers makes reloading at the range convenient, quick and easy. The heart of the system is an aluminum and polymer speedloader based on the Dade design from the 1970s that uses a coil garter spring for retention of the cartridges. While the speedloader's design allows rounds to be loaded individually, the block facilitates pre-staging from six to 10 full reloads—depending on the cartridge—and simply placing the speedloader atop the cartridges and pressing downward on the polymer ring fills it simultaneously. Sets are available for a wide variety of revolver brands and models in chamberings ranging from .22 Long Rifle to .44 Mag. Price: \$90. Contact: Speed Beez; (623) 377-7638; speedbeez.com.

GPO RangeTracker 1800 Rangefinder

Known for working directly with optics plants to deliver high-quality glass at competitive prices, German Precision Optics (GPO) USA now offers a light and compact rangefinder. The RangeTracker 1800 follows the familiar one-hand vertical format preferred by hunters, and is specifically designed to perform in reduced-light environments, adding utility for those critical first- and last-light opportunities. The RangeTracker offers 6X magnification to assist in ranging targets up to 1,800 yds., and features include GPO's GPObright lens coatings, line-of-sight and adjusted-angle distance readings, a scanning function that provides three readings per second, and an outside temperature reading in Fahrenheit or Celsius. Price: \$400. Contact: GPO USA; (844) 692-4667; gpo-usa.com.
